Professional activities:

- 2004-present Owner of SME Betase BV, Barchem, The Netherlands (*writes technical background stories in the fields of chemistry, materials science and information technology*)
- 2014-present President of the Dutch Ceramic Society (Nederlandse Keramische Vereniging - approx. 200 members; *knowledge transfer on ceramics* - voluntary job)
- 2006-2015 Member of the Board of the Netherlands Society for Materials Science (Bond voor Materialenkennis - approx. 800 members; *knowledge transfer on materials science & technology* - voluntary job)
President between March 2010 and June 2015
- 2001-2003 R&D at SME CEPAration BV, Helmond, The Netherlands (*ceramic membranes*)
- 1996-2001 Project leader advanced ceramics at Research Organisation TNO, The Netherlands
- 1994-1996 Post-doc at Netherlands Energy Research Foundation ECN (*ceramic membranes*)
- 1990-1994 PhD Study Chemical Technology, University of Twente, Enschede, The Netherlands (*inorganic materials science, ceramic membrane technology, chemical vapour deposition*)
PhD degree
- 1986-1990 University Master Study Chemical Technology, University of Twente, Enschede, The Netherlands (*chemical physics, materials science*)
Traineeship on *phosphors for fluorescent lamps* at Philips Lighting, Eindhoven, The Netherlands. Final project on *molecular dynamics computer simulations of fast ionic ceramic conductors*
Masters degree with honours

Profile:

Solution-minded, analytical, associative, accurate, quality-driven, critical, self-willed, technically-versed, bilingual Dutch/English, good with numbers, words and code, (misunderstood) sense of humour, sense of perspective, down-to-earth
